

Calcium D Glucarate

- **Supports estrogen metabolism**

Calcium D Glucarate is a compound found in our Breast Secure product. This compound works primarily in the liver and aids in hormone metabolism. Calcium D Glucarate helps the liver to clear the harmful estrogens that come from plastics, our water supply, pesticides and even the estrogens made in our own body. Calcium D Glucarate can be used in combination with DIM as a replacement for FEM Breast Secure if allergic to any of FEM Breast Secure ingredients.

Dosage: Take 1 capsule 3 times daily with meals or as directed by your health care practitioner.

Contraindications: None known.
